Name: Yue Liu

NetID: yl992

Answer to Part B:

Cornell Tech is going to be warm on May 11.

Answer to Part C:

Part C visualization shows the change in temperature over the year for a specific month. It shows a noticeable rise in temperature since 1950, which indicates global warming. The y-axis is the temperature in Fahrenheit and the x-axis is Time.

Thanks for grading. Have a nice day :)
